

# ⚡ LASER-CUT CROSS STITCH! ⚡

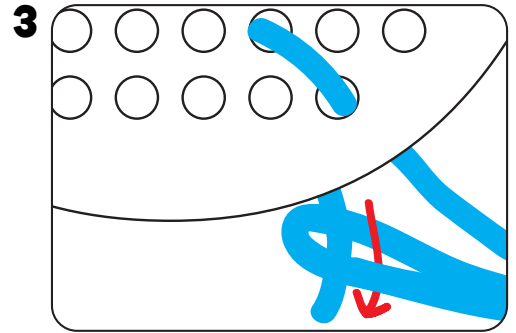

There's really no wrong way to cross stitch. Be creative! You can make your own pattern or design!  
Here's one way to get you started:

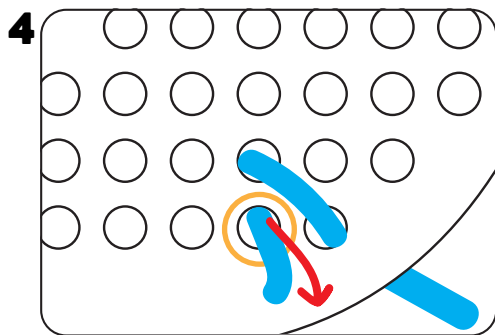

1 Start with the bottom hole in the right corner.

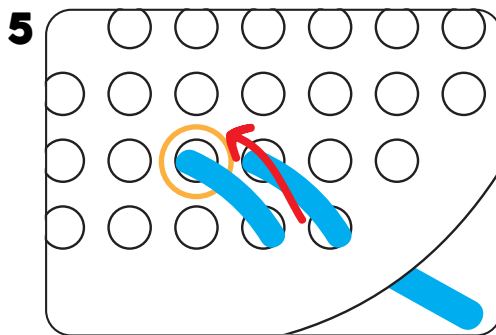

2 Bring taped end through from the back, and then through the front hole diagonal from the start.

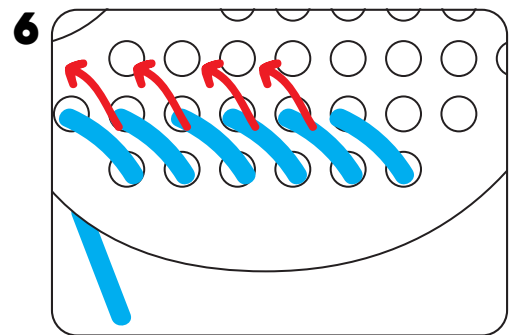

3 Bring taped end through the loop so it forms a simple knot and holds in place.

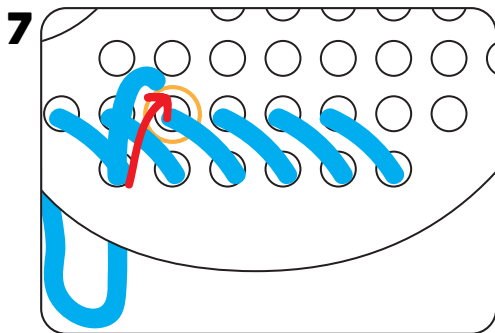

4 Bring taped end through from the back again.

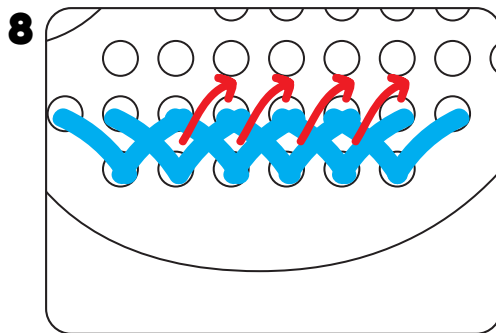

5 Loop taped end through top diagonal hole.

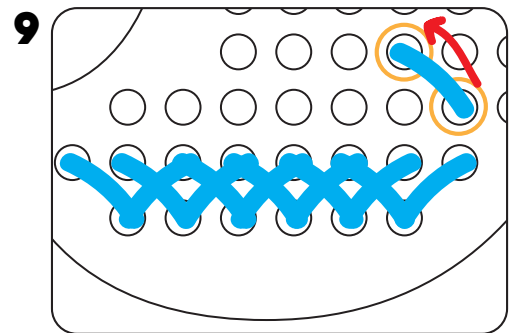

6 Keep going until you get to the end of the row.

7 Bring taped end through bottom hole in the left corner.

8 Go back the way you came, in and out diagonally, making small "X's".

9 You go up to the next row and repeat!

10 When you're finished, or want to change a colour, you can knot the end of the thread and cut it or loop it under a piece of thread.
